

Link to a page within a PDF document (Dreamweaver MX):

1. Determine the page within your PDF document to which you wish to link.
2. Type the text you wish to serve as your hyperlink and highlight it.
3. In the link field, browse to find the pdf document to which you wish to link.
4. Once you have selected your PDF, directly after the filename, type the # symbol and page= (your page number here)

Example:

AASU05_06undergradcatalog.pdf#page=149

5. Save and test your webpage.
